Summary

Akdeniz University Hospital, was established in Antalya, a coastal city, in 1982. A tertiary level hospital with 1050 bed capacity and 33 specialized clinical departments, we are one of the leading medical centers in Turkey. Every year thousands of patients from all over Turkey and other neighboring countries, Russian Federation, Middle East and other part of the world come here to make use of our modern treatment facilities.

Below is a list of intensive care units:

Pediatric Intensive Care Unit:	8 beds
Neonatology Intensive Care Unit:	18 beds
Pediatric Surgical Intensive Care Unit:	4 beds
Anaesthesia And Intensive Care Unit I:	8 beds
Anaesthesia And Intensive Care Unit II:	18 beds
Anaesthesia And Intensive Care Unit III:	8 beds
Thoracic Surgical Intensive Care Unit :	7 beds
Cardivascular Surgical Intensive Care Unit:	11 beds
Coronary Intensive Care Unit:	6 beds
Medical Intensive Care Unit:	7 beds
Post - Anaesthesia Care unit	6 beds

Our intensive care units have beds which have pulmonary therapy technic and rotation position technic. In addition, our units have monitor include parameters which calculate drug dose and help diagnose sepsis.

Mostly, complicated patients are treated in our hospital. These patients come from nearly 30 cities. Our hospital is an important center of composite tissue and organ transplantation. We are the second hospital in the world that has a successful Full Face Transplant from a dead donor. Intensive care nurses are certified and approved by the Health Government. Also our hospital is one of the accredited center that issues this certificate. In addition, they have experience on specific issues, such as donor care, transplantation care and trauma care. We have nursing students as internship, moreover we have hosted nurses as observer from Belgium, Finland and the Netherlands.
